Skills

LANGUAGES

- **JS** JavaScript
- **TS** TypeScript
- HTML
- CSS
- PHP
- Python

FRONT-END

- React
- Redux
- Material UI
- AngularJS

BACK-END

- Sails.js
- MongoDB
- Redis
- Elastic
- Laravel
- MySQL

DEPLOYMENT

- Docker

Recommendation

"Dan excels in front-end development and his knowledge in this area is second to none, I've learnt quite a few things from his wealth of knowledge!
One of Dan's top strengths is his real attention to detail and everything he produces is of the highest quality"

Matthew Watts
Senior Developer at AIM LTD

Daniel Doré
Full Stack Developer

Proficient in JavaScript and comfortable using React and AngularJS. Experienced with both SQL and NoSQL databases, building and integrating with APIs and various back-end languages. Strong technical knowledge and good communication skills coupled with a unique desire to learn and master new technologies

Experience

APPLICATION DEVELOPER

AIM LTD | FEBRUARY 2023 - PRESENT

- Contributing multiple new features to existing enterprise applications and working as a Lead Developer on a new ITSM application
- Tasked with implementing complex front-end functionality to a self-service portal using React, Redux and the Material UI component library - aimdataserve.co.uk 🔗
- Maintaining multiple JavaScript APIs built using Sails.js – including routes, permissions and policies
- Integrating with MongoDB – writing schemas, queries and migrations
- Involved with on-premise deployment using Docker containerisation
- Making UI improvements to a large data governance application built with AngularJS - aimdatabelt.uk🔗
- Leading technical meetings with clients
- Git version control using Bitbucket – pull requests and code reviews
- Agile working – CI/CD and weekly sprint meetings
- Contributing to application roadmaps – JIRA work management system and kanban boards
